DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2,4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Slater 2,401,842 in view of Schweizer 4,244,587.

Slater a lint roller apparatus (col. 1, ll. 1-9), which comprises a lint roll (6) having an adhesive outer surface, a container (col. 3, ll. 15-20), and means for mounting the lint roll on the container as seen in Figure 1. Slater lacks the container containing a cleaning media, a hollow support (13). Schweizer teaches the used of a dispensing container (12) having a cleaning media for a lint remover (102).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to substitute Slater's container with Schweizer's dispensing container, in order to provide a complete cleaning system.

Allowable Subject Matter

3. Claims 3,5-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

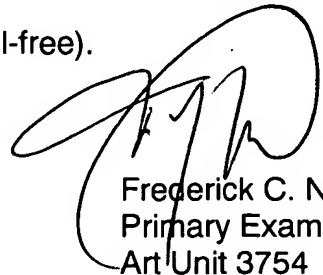

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Swanson 1,039,333, Jessen et al. 6,688,464, Izhak 5,746,531, McKay 6,763,977 and McKay 6,698,626 disclose other types of apparatus having a dispenser and lint removal.
